PHYN

Hear and be heard.

Our legacy is built on connections, the idea that components become greater than the sum of their parts. **SoundForm by Belkin** is a carefully crafted compilation of hardware and intuitive firmware innovations that connects listeners to perfect sound. From the studio, through our audio architecture, directly to your ears.

Belkin sound fuels our everyday moments

**It's not just about sound for
doing sport to, nodding your head to,
moving with, screaming with,
speaking with:**

it's about all of them.

The sounds in life have never shaped our lives more. Belkin is about the sounds we hear and the moments we need to be heard, every single day. It's the sounds of us: expressing, being, hearing the sounds of us living.

From hearing the exact laugh that can't stop you from creasing up. To hearing the sound you heard live when we could all go to concerts.

From the spoken word to immersive sound. From the bassline to the bedtime. Sound is how we connect.

Classic True Wireless Sound

SoundForm™ Rise True Wireless Earbuds

AUC004btBLU | AUC004btBLK | AUC004btWHT

The sound quality you expect from great earbuds with convenient features that go above and beyond.

An ENC algorithm utilising two microphones in each earbud means you'll always be heard on calls. The **SoundForm™ Rise** True Wireless Earbuds are designed to get you through even the longest days with an impressive 7 hours of charge in each earbud and another 24 hours in the wireless charging case.

The IPX5 water resistance rating protects them rain or shine while easy-to-use controls offer the power to change volume, skip tracks, and take calls, all at your fingertips.

UNIQUE SELLING FEATURES

- 7+24 = 31hrs playtime
 - Twin ENC mics in each earbud deliver crystal clear phone and voice calling.
 - Fast Charging: 10 min = 1 hr
 - IPX5 gives great sweat and water resistance for all weather use!
 - 3 pairs silicone ear tips (S/M/L)
 - Driver: 6mm driver with 3 layers for deeper bass

SoundForm™ Accessories

SoundForm™ Connect Audio Adaptor with AirPlay 2

AUZ002vfBLK | AUZ002myBLK

SoundForm™ Connect plugs into your existing audio equipment so you can play digital music directly from your iOS and Mac devices. It works with any devices featuring an optical or 3.5mm input.

SoundForm™ Connect is an affordable way to stream the music you love on your existing system. Stream without the hassle of pairing.

Tap the AirPlay button from music apps to instantly start playing on your speakers.

UNIQUE SELLING FEATURES

- Enables the traditional home sound system to become part of a AirPlay2 speaker ecosystem
- Higher-quality sound. Supports lossless high-resolution audio, which is even better than CD-quality sound.
- NFC connection
- Lowest cost way to enable Airplay2 on you existing AV equipment, Active speakers or TV's
- Colourways: Black
- Wi-Fi with Airplay2
- Optical connection + 3.5mm connection (cables not included)
- 3ft USB-A to C cable included (PSU included)
- Resolution: 16Bit, 20Bit, 24Bit and 32Bit
- Sampling Frequency: 8kHz to 384kHz
- SNR: 106dB
- Dynamic Range: 106dB
- THD+N: -92dB at -1dBFS

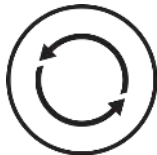

Available Colour

Optical and 3.5mm audio

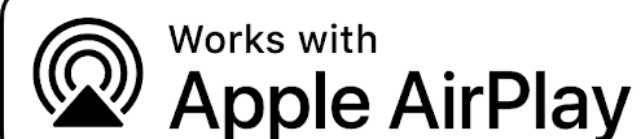

Turn your stereo into an AirPlay 2-enabled speaker

What is AirPlay 2 and how is it different from Bluetooth?

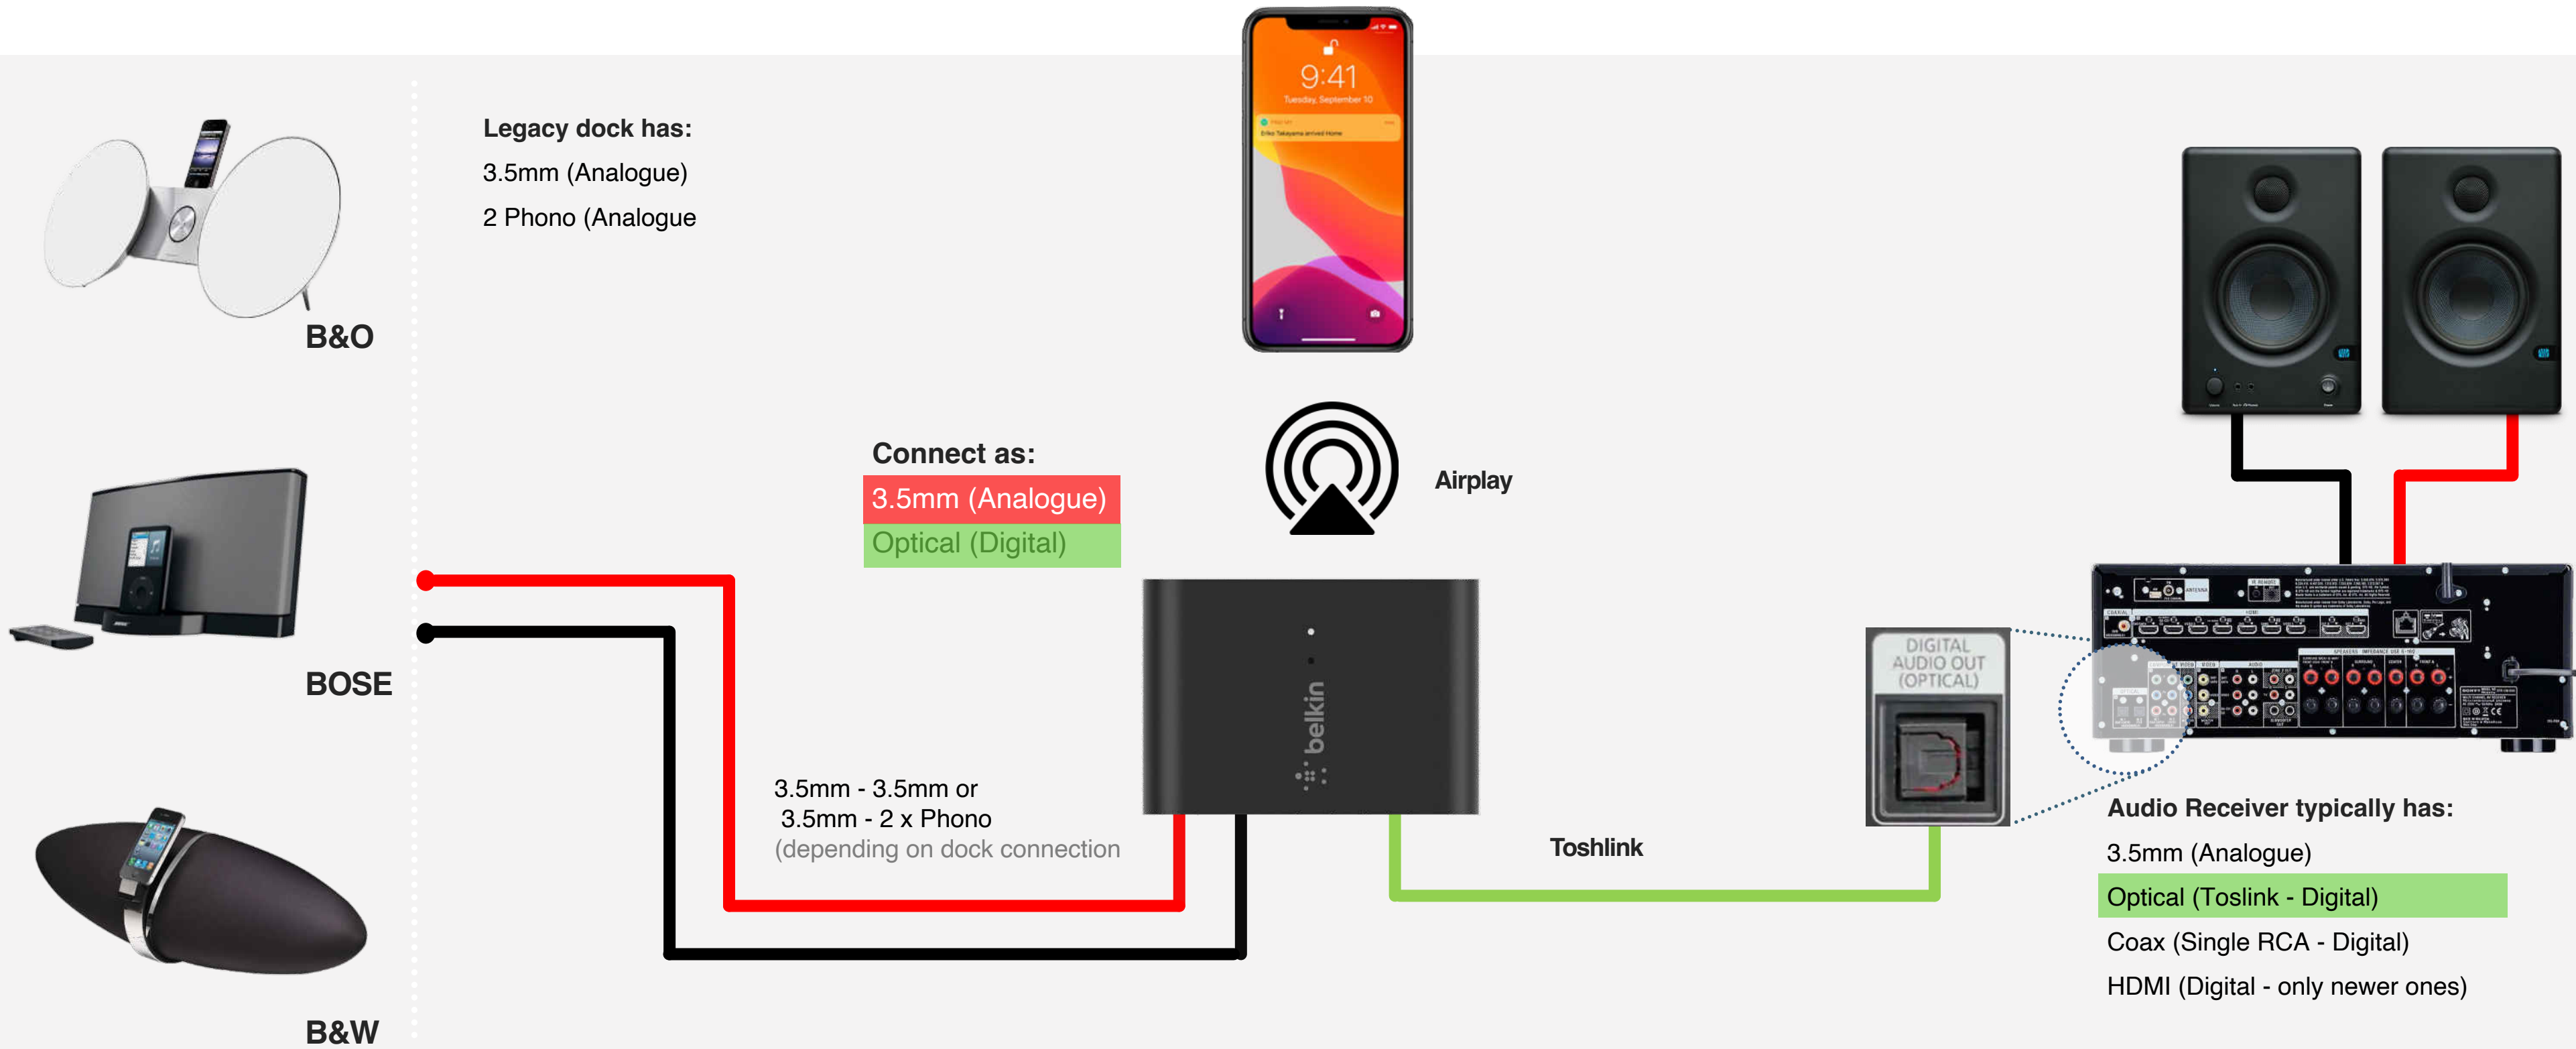

- AirPlay 2 streams your music over your homes Wi-Fi network.
- AirPlay 2 devices like Belkin's speaker and adaptor can be controlled directly from iOS devices or through the Home APP.
- Play your favorite music in one room, while another user stream a podcast to another. Or even sync up multiple AirPlay 2 devices for the same music throughout your home!
- AirPlay 2 combines with Apple Music and your friends can add their own music to your playlist.
- AirPlay 2 also works directly from the Spotify dashboard. Depending on what source device you are using features like "Play Everywhere" are also available.
- Belkin's CONNECT AirPlay 2 Adapter (£89/€99) is the most affordable way to convert your existing audio equipment into networked AirPlay 2 speaker so that you can easily stream your digital music from your iOS device in the simplest way with the best possible audio quality!
- Belkin CONNECT also supports the new Apple Lossless audio codec up to 16bit @ 44.1kHz resolution.

- Bluetooth connection is point to point – which means that your device (phone) is directly connected to your speaker.
- Audio is also highly compressed compared to AirPlay 2
- No multi-room options available over Bluetooth

Connect solution

User plugs it into an Audio Receiver and turns existing Audio System, into a networked AirPlay 2 speaker!

THANK YOU
